

astro Hiking Bench

AB RE presents the new ASTRO Optimist Hiking Bench. With the same beam, side panel high and with the gunwale of an ASTRO, you can now train at home while studying or watching TV, like you would be doing it on your boat..

Designed to last, we make it in Barcelona in 6082 aluminium, silver anodized, it is fully button foldable without tools (just your fingers).

Footstrap is padded for better comfort and can be adjusted to the right angle. External dimensions are 1050 x 560 x 415 mm.

All fittings are attached with stainless steel screws and lock nuts. In addition, all nuts are insulated with plastic washers to prevent galvanic corrosion between aluminium and steel.

***If you don't have an ASTRO Optimist by now,
you can at least have the feel..!***
